CAREER OBJECTIVE

Cloud & DevOps Engineer with hands-on experience building production-grade AWS infrastructure using Terraform (IaC), designing CI/CD pipelines, and containerising applications with Docker and Kubernetes. Skilled in Linux systems, network security, and cloud automation. Seeking an entry-level Cloud or DevOps Engineering role to contribute and grow within a high-impact team.

EDUCATION

Bachelor of Computer Applications (BCA), Pune University (8.75 CGPA) 2023-2026

TECHNICAL SKILLS

- **Cloud** : AWS — EC2, S3, IAM, VPC, Auto Scaling, ALB, Lambda, CloudWatch, SSM, Secrets Manager, AWS CLI
- **DevOps & IaC** : Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Docker Hub, Nginx Linux & Systems Linux, Bash Scripting, SSH, Git, Networking
- **Languages** : Python (primary), C, C++, Java, JavaScript, SQL, HTML, CSS
- **Other** : DSA (Python), YAML, JSON, Android Studio

PROJECTS

High-Availability AWS 3-Tier Web Architecture | Terraform, AWS EC2, VPC, ALB, Auto Scaling, S3, IAM, SSM

- Designed and provisioned a 3-tier, multi-AZ AWS architecture using Terraform, with an Application Load Balancer and Auto Scaling Group for fault tolerance. Demonstrates infrastructure-as-code practices for building resilient, self-healing web applications.
- github.com/ariba18/aws-ha-infrastructure

Cafe Deployment Pipeline — Cloud-Native CI/CD | Jenkins, Docker, Kubernetes, AWS EC2, Nginx, GitHub

- Built a cloud-native CI/CD pipeline automating build, test, and deployment of a web application using Jenkins, Docker, and Kubernetes. Showcases end-to-end DevOps automation from code commit to container orchestration.
- github.com/ariba18/Cafe-Deployment-Pipeline

Prometheus Grafana Monitoring

- Developed a Flask-based Task Management REST API instrumented with 5 custom Prometheus metrics, paired with Grafana dashboards for real-time observability. Fully containerized the stack using Docker Compose across five iterative build sessions.
- github.com/ariba18/prometheus-grafana-monitoring

AWS Serverless Todo API

- Built a fully serverless REST API using AWS Lambda, API Gateway, and DynamoDB, with the entire infrastructure — 19 resources across ap-south-1 — provisioned via Terraform. Implemented GitHub Actions CI/CD and CloudWatch monitoring for automated deployment and observability.
- github.com/ariba18/aws-serverless-todo-api

CERTIFICATIONS AND COURSES

- AWS Certified Solutions Architect - Associate (AWS-SAA-C03).
- Training and Advanced Certification in Cloud Computing and DevOps.
